

DESIGN EXPLORATION · JULY 2026

InstaCalc *levolve*

20 ways to wear the same product

Twenty homepage + calc-navigation concepts, each borrowing the skeleton of an app people already know — Reddit's feed, Wikipedia's reference density, McMaster-Carr's catalog speed, Airbnb's marketplace warmth. The product never changes: live editable calcs, a browsable gallery, search, sharing, remixing. Only the bones move: top bar, side rail, feed, grid, canvas, full-screen.

Every concept is a working page — the calc in each screenshot is a real, live evaluator. Flip through them at **levolve** with ← → keys, or press G for the overview grid.

instacalc.com/evolve · [branch claude/instaCalc-ui-layout-gallery](https://github.com/claude/instaCalc-ui-layout-gallery) · built from jshell.com

The lineup

same product, twenty skeletons — press G on /evolve for this view

01 One Box · Google

The homepage IS the calculator. One input, instant answer card, gallery demoted to trending links.

02 The Feed · Reddit

Gallery becomes a ranked feed: upvotes, remix counts, topic communities (c/finance). Great for discovery, calc opens in place.

03 The Reference · Wikipedia

Every calc is an encyclopedia article: dense internal links, contents rail, live calc as the “infobox”. Authority through plainness.

04 The Catalog · McMaster-Carr

Ruthless density and speed: every calc is a part with specs. Filter rail, instant search, zero decoration. For power users.

05 The Marketplace · Airbnb

Calcs as destinations: big friendly search pill, category chips, image-forward cards with ratings and saves.

06 The Directory · Craigslist

Zero design as a feature: the entire gallery on one page as plain links. Fastest possible scan; nothing competes with the content.

07 The Ranking · Hacker News

Pure ranked list with points and comments. The first item expands inline — using a calc never leaves the list.

08 The Superstore · Amazon

Search-dominant with facet filters and heavy trust signals: star ratings, usage counts, “used this month”. Calc gets a Buy-Box.

09 The Channel Grid · YouTube

Calcs as videos: preview thumbnails with a “6 steps” badge, author channels, chips for topics. Subscriptions = follow calc authors.

10 The Shelves · Spotify

Dark library with horizontal shelves (“Made for you”, “Trending”) and playlists as calc collections. The open calc lives in a persistent now-playing bar.

11 The Workspace · Notion

Calcs as pages in a personal workspace: sidebar tree, breadcrumbs, blocks. Gallery is a linked database at the bottom of the page.

12 The Command Line · Linear

For heavy users: dense triage list, side peek, and a ⌘K palette as the primary navigation. Everything reachable without the mouse.

13 The Repo · GitHub

A calc is a repo: stars, forks (“remixes”), history, README. Naturally social + versioned — remix culture made explicit.

14 The Pitch · Stripe

A real marketing homepage: gradient hero, floating live product demo, social proof, feature triplet. For the logged-out first impression.

15 The Grid · Excel

Meets spreadsheet users where they live: ribbon, formula bar, editable cells with row/column headers, sheet tabs as multiple calcs.

16 The Canvas · Figma

Calc as an object on an infinite canvas: layers panel lists every line, properties panel controls format/units/decimals. Community tab = gallery.

17 The Wall · Pinterest

Pure visual browse: masonry of calc “pins” at mixed sizes — some show working, some just the big answer. Save to boards = collections.

18 The Keynote · Apple

Radical focus: huge type, one device frame, generous whitespace. The gallery appears only as a teaser band. Sells the feeling, not the features.

19 The Clubhouse · Slack

Community-first: topic channels, calcs shared as unfurled live cards inside conversation, reactions as lightweight ratings.

20 The Stream · TikTok

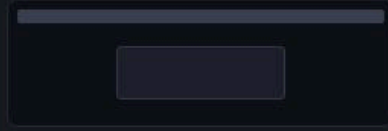

Full-screen, one calc at a time, swipe to browse. Remix/like/share as first-class gestures. Gallery becomes a For-You feed of math.

The switcher /evolve opens on this overview — click any card, or arrow-key through layouts

InstaCalc /evolve

20 homepage + calc-navigation concepts, each borrowing the bones of a familiar app. Same product — live calcs, gallery, search — different skeleton. Use ← → to flip, G for this grid.

History (14)

Party budget calculator

From InstaCalc, the calculator anyone can edit. Maintained by u/kazad; last updated 3 hours ago.

A **party budget calculator** estimates the total cost of hosting an event by combining [per-guest costs](#) with fixed expenses such as [venue rental](#) and [entertainment](#). Edit any value in the infobox — every dependent line recalculates instantly.

The model assumes cost scales linearly with attendance. For events above ~75 guests, consider the [Catering Tiers](#) remix, which introduces volume discounts. Related conventions include the [50/30/20 rule](#) for household budgeting and the [per-head metric](#) common in event planning.

Calcs as pages in a personal workspace: sidebar tree, breadcrumbs, blocks. Gallery is a linked database at the bottom of the page.

The screenshot displays the instacalc.com interface, which is designed for heavy users. It features a dark theme and a layout that prioritizes keyboard navigation.

Calculator List: A dense list of calculators is shown, each with a color-coded icon, a title, a category, and a status. The list includes:

- CALC-140: Mortgage Payoff Planner (Finance, S, 2d)
- CALC-141: Tip & Bill Splitter (Everyday & Fun, K, 5h)
- CALC-142: Compound Interest Calculator (Finance, M, 1d)
- CALC-143: Recipe Scaler (Cooking, C, 3d)
- CALC-144: Road Trip Fuel Cost (Travel, N, 6d)
- CALC-145: Freelance Hourly Rate (Finance, I, 12h)
- CALC-146: BMI & Calorie Target (Health & Fitness, F, 1d)
- CALC-147: Startup Runway (Business, F, 4d)
- CALC-148: Paint Coverage Estimator (Home & DIY, D, 1w)
- CALC-149: Retirement Savings Projector (Finance, F, 8h)
- CALC-150: Unit Converter Pro (Conversions, K, 3h)
- CALC-151: Loan Comparison (Finance, S, 2d)
- CALC-152: Workout Pace Calculator (Health & Fitness, R, 5d)
- CALC-153: Solar Panel ROI (Home & DIY, G, 1w)
- CALC-154: GPA Calculator (Education, P, 1d)
- CALC-155: Currency Trip Budget (Travel, N, 3d)

Search Palette: A search palette is open, showing a list of commands and search results. The palette includes a search bar, a list of commands (New calc, Browse gallery, "mortgage" — 12 calcs, Share current calc), and a keyboard shortcut (⌘K).

Party Budget Calculator Detail: The detail view for the 'Party Budget' calculator (CALC-141) is shown. It includes a title, a description, and a list of variables and formulas:

- # Party budget 🎉
- guests = 30
- costPerPerson = 18
- food = guests * costPerPerson
- venue = 250
- music = 120
- total = food + venue + music
- perGuest = total / guests

The detail view also shows the status (Live), owner (kazad), collection (Events), uses (18,340), and shared status (public link).

For heavy users: dense triage list, side peek, and a ⌘K palette as the primary navigation. Everything reachable without the mouse.
